

Theobald Software Company Profile

Long version (1,538 characters incl. spaces)

Since 2004, Theobald Software has been the expert in seamless SAP integration. Our SAP-certified technology enables companies to unlock the full value of their SAP data and use it across a variety of systems outside of SAP. This includes cloud platforms, BI and analytics systems, as well as databases and data warehouses, among other third-party systems. Over 4,000 companies of all sectors and sizes worldwide rely on our expertise to efficiently manage their SAP data and strategically leverage it, for maximum return on investment from their SAP investments.

Our international team of around 60 employees, with high development competence, extensive experience, and personalized service and support, ensures that SAP data integration is almost effortless. We have a long-standing partnership with SAP and offer solutions that are certified for integration with SAP applications. To continuously expand our knowledge and competencies, we collaborate closely with leading ISV and OEM partners from various sectors and around the world, including Alteryx, AWS, Board, Snowflake, Nintex, UiPath, among others.

In our world, it is not only data that plays an important role, but also values and responsibility towards society. With our own Ethics Council, we commit to taking a clear stance on important social issues. We uphold this position in our way of working, in our corporate culture, and in relationships with employees, customers, and partners. Openness, respect, and diversity are important values for us that we live by every day.

Short version (616 characters incl. spaces)

Since 2004, Theobald Software has been the expert in seamless SAP integration. Our solutions enable the use of SAP data in almost any third-party system, whether on-premises or in the cloud. Over 4,000 companies of all sectors and sizes trust in our expertise to utilize their SAP data efficiently and strategically. Our success is built on an international team of around 60 highly qualified professionals and strong partnerships with SAP, Alteryx, and other global companies. Developing optimal solutions for our customers and consistently following a clear ethical compass is always at the forefront of our minds.
