# ERPConnect Services

You have implemented sophisticated business processes in SAP and would like to make them available in SharePoint? In addition, you are tired of not being able to design your workflows involving SAP without any restrictions? Furthermore, users without SAP knowledge require access to relevant SAP data? Then you've come to the right place!

Our product ERPConnect Services offers you a lean and simple solution for read and write access to your SAP ERP system. This enables you to integrate directly with workflow solutions as well as coordinate and automate your business scenarios.

A wide variety of different use cases is possible, such as processing a **purchase requisition**. The workflow can be designed according to your needs, for example with an approval process. Also, **Employee Self Service processes** (ESS) and solutions for **Master Data Management** can be developed very intuitively.

We are happy to support the implementation of your scenarios.

SAP Purchase Requisition

Material \* 100-100

Material Descriptions Casings (100-100)

Plant \* 1000

Quantity \* 8

Delivery Date 3/28/2019

#### Your advantages at a glance:

- » Easy usability and cost reduction by providing perfect interaction between end users and SAP.
- » Link SAP objects with **SharePoint** and **Nintex**, seamlessly.
- » Make any kind of master data and processes available in real-time.
- » Single Sign-On for a better and secure user experience.
- » SAP certified technology.

#### » Unrestricted Nintex integration:

The integration with **Nintex Workflow** is also supported by specifically developed **custom actions**. SAP access in **Nintex Forms** is possible with different approaches.
