

ERPConnect Services for Nintex

Seamless Integration of SAP and Nintex

ERPConnect Services for Nintex

Do you want to make more of your Nintex Workflows and SAP processes?

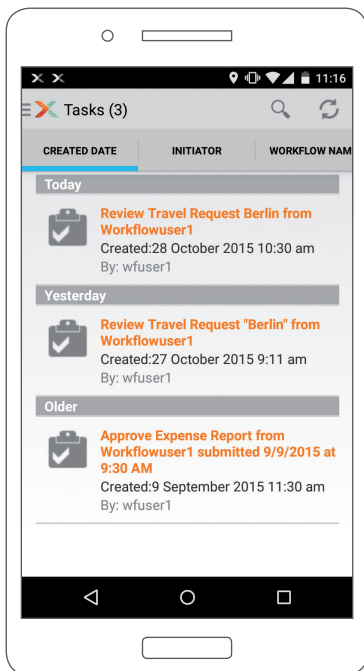

Process integration is the key: **Nintex** is the perfect tool to optimize processes, workflows and procedures. Use this strength and automate your SAP processes via **Nintex** directly in **SharePoint**.

How does this approach work?

With specifically developed **Nintex Workflow Custom Actions**, Theobald Software enables read and write access to SAP directly from **Nintex Workflow** and **Nintex Forms**. The custom actions for SAP allow the implementation of a large number of use cases from different lines of business.

How about a real-world example?

With our solution, you can use **Nintex Workflow** and **Nintex Forms** combined with **ERPConnect Services** to create quality notifications in SAP. Besides that users can easily create such notifications with an intuitive form directly from **SharePoint**. Another use case is master data management or Employee Self-Service scenarios such as the processing of leave or travel requests.

Combine the benefits of **SAP**, **SharePoint** and **Nintex** with the integration experience of Theobald Software. **ERPConnect Services** simplifies SAP connectivity between these applications.

Your advantages at a glance:

- » Straight-forward SAP integration, easy to install and configure
- » Ready-to-use Nintex Workflow Custom Actions
- » Integration with Nintex Forms supported
- » Pre-built workflow templates for integration scenarios (Sales, Procurement, Master Data Management, Travel, etc.)
- » No-code solution
- » No installations or add-ons necessary in SAP
- » Based on proven and certifiable SAP integration technology
- » Lower development costs
